

Donnelly-Boland and Associates was founded by Fay K. Boland, CPA and incorporated in 1992 to provide expert accounting services to small businesses and nonprofit and government agencies that needed an affordable alternative to in-house accounting functions.

Through the services offered by Donnelly-Boland and Associates, our clients are able to access and manage their finances in an efficient and cost-effective manner through improved information and accurate reports. They experience better cash flow management, tax and financial planning, and improved utilization of staff resources. This frees both management and staff to focus on their core strengths, providing and improving the services that will ensure success.

At Donnelly-Boland, we know small businesses and nonprofits routinely work with a limited staff. It is often beyond their resources to retain a full-time accounting employee.

We have the perfect solution: a broadly skilled staff of professionals who can provide help in processing your financial data on an as needed basis, improving the flow of critical financial information and solving your most difficult bookkeeping issues. Our staff is highly trained, locally based, and with low turnover.

For larger corporations, Donnelly-Boland provides transition management. These highly skilled individuals assist in creating a seamless transition when one of your key financial employees leaves or retires, helping assure the smoothest possible transition and replacement process.

Our services go beyond basic accounting and tax preparation to include process outsourcing, contract staffing, and business consulting, including both technology and human resources consulting.

Donnelly-Boland and Associates is committed to delivering quality, commitment, and value. You'll also find our services are reasonably priced and affordable.
